

Your Partner in Sustainability

We are a recognized member of the Ricoh Eco Excellence Program

Eco Excellence Program dealers share sustainability values with Ricoh — and as a recognized member, we are committed to reducing our own environmental impact and helping customers do the same. When customers work with us, they can be confident that our team is prepared to talk about sustainability, educate about best practices and lead them through the products, services and solutions that have environmental benefits.

Membership in the Ricoh Eco Excellence Program is awarded only to dealers that meet key criteria — including the dealer's track record of environmental sustainability commitment and ability to provide customers with education, awareness, program support and guidance. Whether you have a key target goal for resource reduction or just want to improve the sustainability of your workplace, we can walk you through major sustainability improvement areas — including modernizing printers, printing more efficiently, making use of digital processes and creating a sustainable workplace.

Why work with a recognized Eco Excellence Program dealer?

- Work with a partner that is “walking the walk” themselves
- Participate in learning opportunities
- Discover how best practices can help you save energy, paper and other resources
- Learn how to reduce your environmental footprint with hard data
- Recycle consumables easily and responsibly
- Turn your sustainability challenges into wins

We're ready to partner with you

Modernize printers

Our devices deliver superior energy performance by utilizing smart technologies and features. We are a strong supporter of ENERGY STAR® and strive for “practical” energy performance to achieve the ENERGY STAR qualification while maintaining ease of use. Enjoy built-in advanced energy management features — such as Quick Start-Up (QSU) and low Sleep Mode electricity consumption. Utilize the Smart Operation Panel with built-in green reporting tools. Our devices are also listed in the EPEAT® (Electronic Product Environmental Assessment Tool) program — a comprehensive environmental procurement standard (IEEE 1680.2) for imaging equipment that helps customers identify greener products through the rating of various environmental attributes.

Print efficiently

We understand how easy it is for an unmanaged print fleet to generate significant waste. Taking control over your devices and practicing environmental stewardship can be difficult if you don't know exactly where the problems are — and how to optimize your fleet. Our print solutions can help you extend environmentally friendly printing to everyone, including mobile employees and guests. Reduce waste caused by printing

mistakes with Secure Document Release. Increase accountability with User Tracking, Reporting & Chargeback. We can also show you how you can leverage energy efficient MFPs to print from legacy host systems — as well as how digital proofing can reduce unnecessary output.

Use digital processes

Our comprehensive technology can help you go green by going digital — enabling seamless document conversion, high-quality image capture, paperless file storage, digital collaboration and more. A comprehensive sustainability improvement plan takes into account many kinds of processes that rely on paper — giving you the tools to capture, classify and route various data formats to where you need them. Replace paper records with digital files. Use electronic processes

for data and photos, and replace hardcopy signatures and forms with digital processes. You can also send and receive faxes without generating waste with advanced faxing capabilities that enable communication between desktop computers, MFPs and other devices. Our solutions can help you create an efficient digital workflow that saves paper, saves energy or both.

Create a sustainable workplace

Improving sustainability goes beyond just your documents and print processes. Our solutions can help you reduce your overall environmental impact through changes in your workplace — from transforming meeting and conference spaces to reducing discarded handouts with digital presentation technology. Reduce the need for print output with electronic projected visuals and digital collaboration hardware. Bring people together with video teleconferencing devices and reduce a portion of required travel — and its associated environmental impact.

Improve sustainability with practical guidance

We understand that planning and taking steps to become more sustainable may be unfamiliar and therefore seem challenging. As an Eco Excellence Program dealer, we are equipped to help you start or continue in your efforts to reduce environmental impact. We can show you just how our portfolio of products and programs can help you make your organization more sustainable across many aspects of your day-to-day operations — saving both paper and energy. We can also show you how enhancing sustainability can be cost-effective and improve productivity for your organization. Additional programs and resources include the Carbon Calculator, Consumables Take-Back Programs, assessments/evaluations of your current environment and proposals/recommendations for sustainability improvement. We are ready to bring our knowledge and experience to help guide you and serve as your true partner in sustainability.
